

# Arval Select

**Arval Select** is a flexible formula allowing drivers to combine the long-term leasing of a main vehicle with access to other vehicles that better meet their changing mobility needs. This way, drivers won't be limited to one single lease vehicle, but can decide on which vehicle to drive, whenever they want.

This could be a people carrier for a holiday with the children, a van for moving, or a different type of vehicle better suiting the needs of the drivers. With **Arval Select** a vehicle can even be hired abroad!

## ■ Easy to use

Your driver can choose **Arval Select** when ordering a new lease vehicle. Arval calculates the monthly budget needed for using the **Arval Select** vehicles based on the vehicle category chosen and the number of days it will be used. This amount is included in the monthly lease price and settled when the driver uses **Arval Select**. The vehicles can be delivered and collected for EUR 36,00 per journey. If needed, Arval can provide rates and availabilities of other vehicle categories.

**Arval Select** is available abroad as well. The driver informs Arval about the desired type of vehicle and the city or airport where the vehicle needs to be rented. For each rental abroad, an administration fee of EUR 45,00 will be deducted from the budget.

The available budget may be exceeded with approval from the employer. The extra cost is invoiced to the employer, who can then bill the driver in turn.

A cancellation fee of EUR 75,00 will be charged if the reservation is cancelled with less than 48 hours notice.

If there is any budget left at the end of the contract, this will either be carried forward to the following contract, or reimbursed to the employer on return of the lease vehicle.

Here are a few examples of the monthly budget needed to use the vehicle during the specified period.

Break	People carrier	Van
		
from	from	from
<b>EUR 77,11/month</b>	<b>EUR 73,89/month</b>	<b>EUR 28,64/month</b>
this vehicle can be used	this vehicle can be used	this vehicle can be used
<b>14 days/year</b>	<b>14 days/year</b>	<b>5 days/year</b>

## ■ Better value for your drivers

The benefit in kind is calculated based on the list price and the CO<sub>2</sub> emissions of the lease vehicle. By choosing a compact and more environmentally friendly long-term lease vehicle, your driver can save on their benefit in kind every year.

## ■ Corporate Social Responsibility

Many drivers would like to use electric vehicles, but choose diesel as they need to drive long distances a few times per year.

**Arval Select** makes it possible to drive an electric vehicle throughout the year and to have access to a non-electric vehicle when necessary.

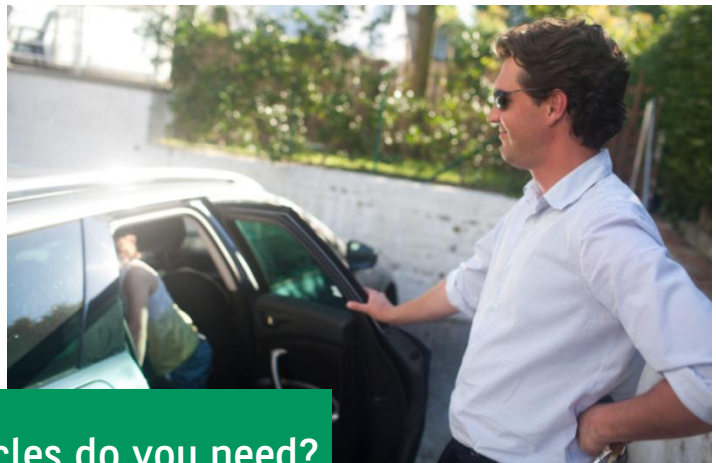

## ■ Better for the environment, and for your budget

When a driver chooses a smaller or more energy-efficient vehicle for a long-term lease, they make a choice in favour of sustainable mobility. This reduces CO<sub>2</sub> emissions, which is good not just for the environment, but also for your budget (fuel consumption, tax benefits etc.).

## ■ Fewer parking problems, less stress

Drivers who live in the city centre often face problems when parking. However, they still opt for a large vehicle as they occasionally need the extra capacity.

With **Arval Select** this is a thing of the past, and your driver can count on having access to a large vehicle when the need arises.

How many vehicles do you need?

## Why choose Arval?

Arval is a leading Full Service Leasing company that manages over 700,000 company cars worldwide, covering both vans and passenger vehicles.

Whatever the size of your fleet – whether it comprises a few cars or a few thousand – we can help you choose a full service solution that meets your specific financial needs. With 25 years of experience and expertise, our enterprising and dedicated employees will provide you with a high-quality, long-term solution for the management of your fleet.
