For your information: the monthly rent of a rental agreement for a Spring Deal vehicle is calculated according to the agreed contractual term (between 25 and 60 months or 84 months for light commercial vehicles) and the agreed annual mileage and includes: maintenance, repairs, unlimited summer and winter tyres in case of normal use/wear and tear, registration tax (TMC), road tax, depreciation and interest, European assistance service, a replacement vehicle in case of immobilisation of more than 24 hours, Perfecta service (Arval Belgium SA covers the risk of damage to the vehicle, total loss or theft) with own risk (lump sum) to be paid by the renter and insurance**.

Not included in the monthly rent: energy and/or fuel costs and traffic fines. The CO2 levels are also indicative and depend on the options chosen and/or the data provided by the manufacturer. At the end of the rental agreement, a mileage statement will take place at the last contractually agreed price. In the event of early termination of the rental agreement, a lump sum calculated based on the last daily price (as contractually agreed) will be charged.

** Third-party liability insurance, legal protection insurance and driver's insurance are included in the monthly rent price when taken out by Arval Belgium NV, in the name and on behalf of the renter. Arval Belgium NV is registered as an ancillary insurance intermediary with the Financial Services and Markets Authority (FSMA - www.FSMA.be) under number 0436.781.102. These insurances can also be taken out with the insurer of your choice. Third-party liability insurance is required by law.

If the displayed monthly rent indicates a prepayment amount, it means that the payment of this amount will reduce the amount of the monthly rent for the duration of the rental agreement. Prepayment is not a "guarantee" or a "deposit". In the event of early termination of the rental agreement, this prepayment will not be refunded, except in certain cases specified in the prepayment conditions.

The estimated delivery time of the vehicle depends on its availability with the manufacturer and/or importer and/or the equipment and/or configuration chosen.
